CERTIFICATE OF COMPLETION

Functional Requirements

The Travel Smart portal will be designed as a Single-Page-Application (SPA) and responsive Website with a set of pages and menus that represent the choice of activities to be performed. The pages, menus, and other visual elements must be designed in a visually appealing manner with attractive fonts, colors, and animations. All of these should also be laid out in a responsive manner.

Following are the functional requirements of the portal:

Trip Catalog:

Users should be able to view comprehensive information about different destinations(individual or as package tours).

Users should be able to view picture galleries of these destinations and the prices for each destination or tour. Activities that can be done (for example, paragliding or jet skiing) and popular tourist attractions of each destination must also be shown on the site.

Accommodations associated with each location must be shown in a hardcoded format. Transport options (that is, how to reach a specific destination) must also be shown to users.

Each tour listing should display detailed information about the tour with description, images, and video, when it will start, and additional discount if booked in advance.

o Accommodations Display:

- [List of available accommodations associated with each*

destination.

- *Details of each accommodation including type (hotel, hostel, resort, and so on), rating, and amenities.*

o Transport Options:

- *Clear display of transport options to reach the destination (for example, flights, trains, buses, or car rentals).*
- *Information on the nearest airport, train station, or busterminal.*
- *Estimated travel time and price for each transport option.*

All these data must be shown in a hardcoded format.

Search and Navigation:

Users should be able to search for a specific destination, tour, or activity by name or keywords. The Website should provide navigation options to access different travel categories and sections.

Sorting:

Users should be able to sort the trip catalog based on various criteria, such as price, popularity, or alphabetical order. Optionally, users should be able to filter trips based on specific attributes on date, price range, destination type, duration, and rating.

Feedback:

Feedback menu option should enable users to provide their feedback about this Website through a feedback form.

Package Tour Review:

This feature should allow users to leave reviews and rate destination, tours, and services. This data will not be saved anywhere, as that is beyond the scope of the site.

About:

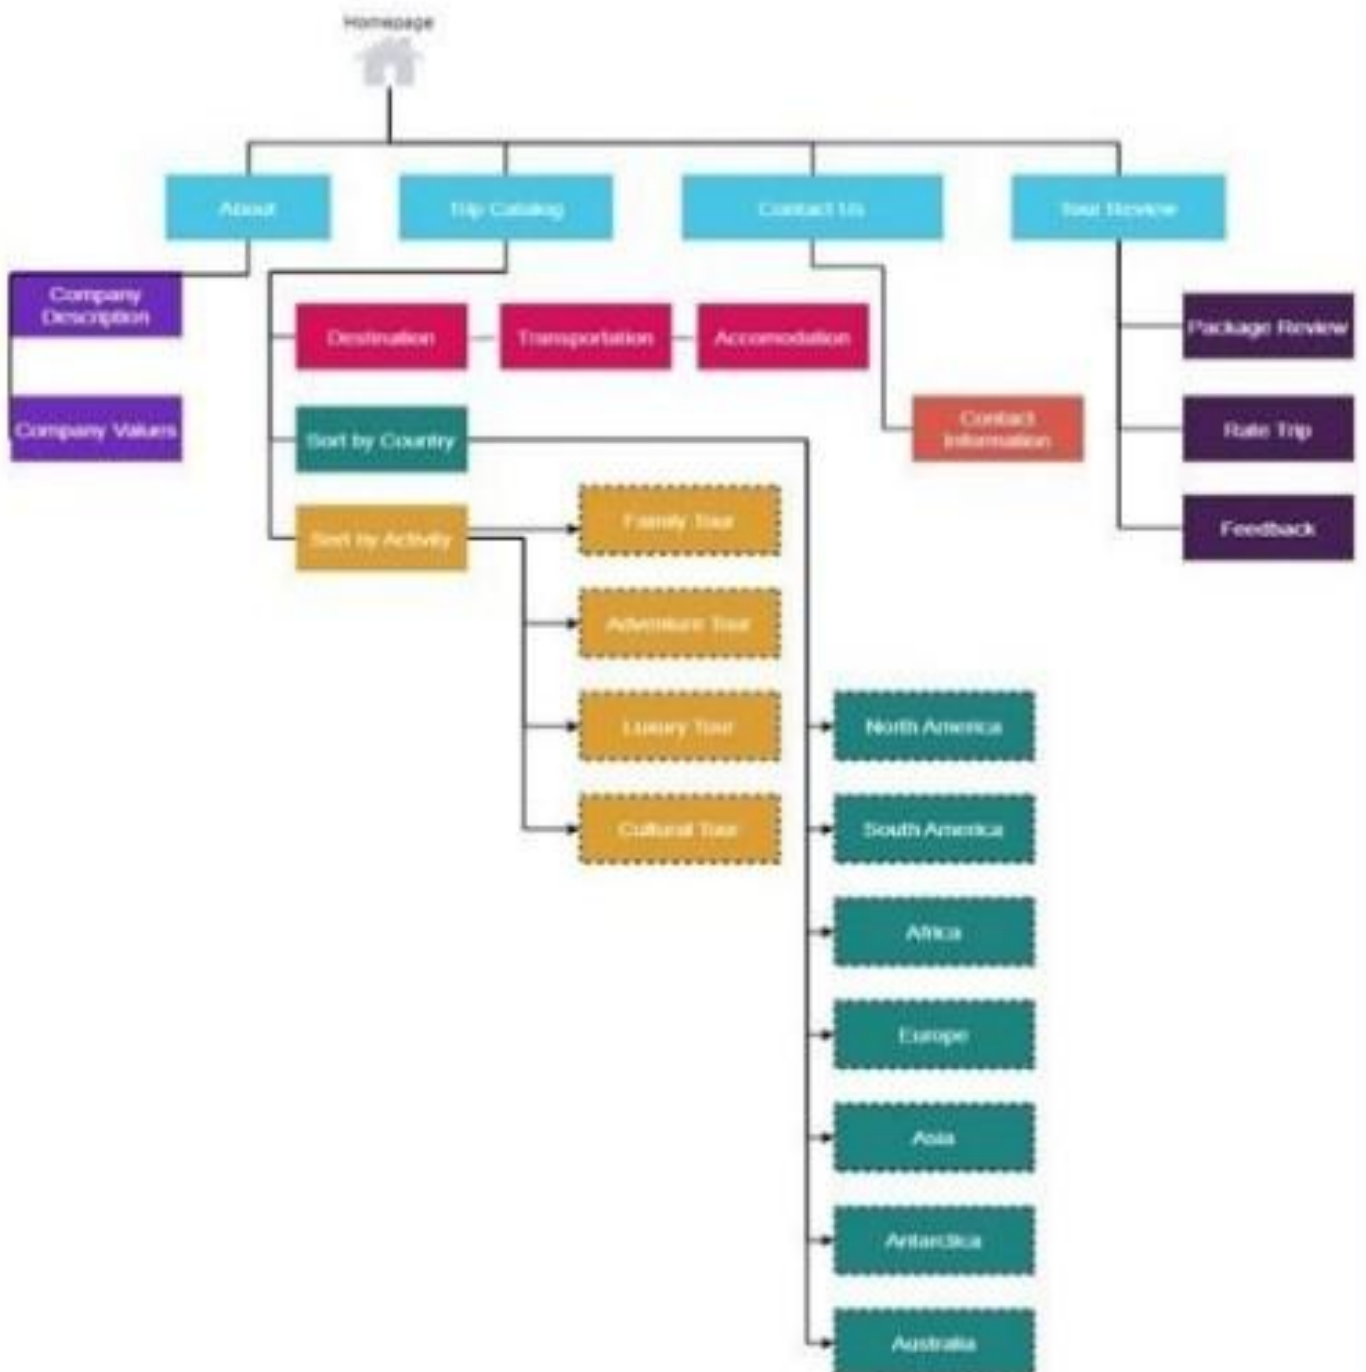

This option should display a brief introduction about the Web portal including its name, history, and the nature of business. An About Us page is an essential component of a Website offering users insight into the Web portal - company's identity, mission, and values.

Contact Us:

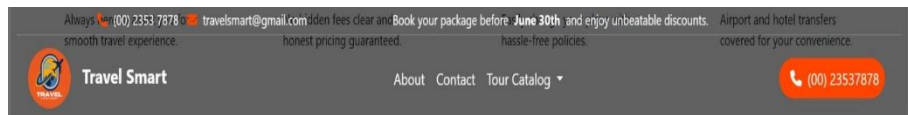

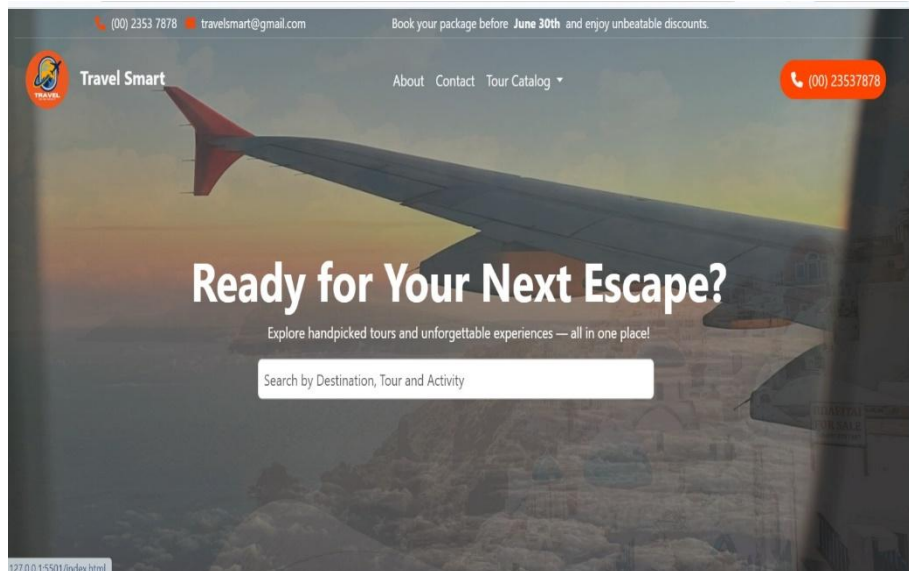

Contact Us menu option should enable users to contact the creators of the Website. An email id and/or contact number can be displayed here as contact information. You can also make use of GPS/Geolocation here.

Sitemap: *To help users understand the flow of the Website, you will create a Sitemap and add it to the home page of your Website.*
